

The world's premier solution for ad-hoc analysis, tabulation & Web dissemination of demographic statistics:

# SuperSTAR II™

The US Census Bureau chose SuperSTAR II for its ease-of-use and superior performance to create Census 2000 summary data products. \* Statistical agencies worldwide have made the same choice.

Alta Plana designed the Census Bureau's SuperSTAR-centered query & production system on contract to IBM Global Services. We're eager to apply our expertise - in decision support, data analysis, SuperSTAR II™ & SAS® software - to enhance and accelerate your organization's analysis, production, publication, and Web dissemination of demographic statistics.
